Dear Friends and Colleagues from Around the World,

It is with enormous pleasure and great excitement that we welcome you to Dallas, Texas for the 13th World Congress of Hair Research. The WCHR meetings represent the most anticipated gathering of hair researchers from across the globe, who come together every two years for this extraordinary meeting. We are delighted to have participants from 39 countries at the 13th WCHR, including Argentina, Australia, Belgium, Brazil, Canada, China, Colombia, Costa Rica, Croatia, the Dominican Republic, Egypt, France, Georgia, Germany, India, Ireland, Israel, Japan, Kenya, Latvia, Malaysia, Mexico, the Netherlands, Poland, Russia, Serbia, Singapore, South Africa, South Korea, Spain, Sweden, Switzerland, Taiwan, Thailand, Tunisia, Turkey, Ukraine, the United Kingdom, and the United States. The 13th WCHR is also very special because on Monday April 8, 2024, we will turn our collective attention to the sky and be awed by a once-in-a-lifetime celestial event, the Total Solar Eclipse of 2024.

The word eclipse comes from 'ekleipsis', which is the Greek word for being 'abandoned'. Ancient civilizations believed that the sun had 'abandoned' the earth, whereas the Greeks believed that it was the Gods who had 'abandoned' them and darkened the sky. Eclipses are also inversions in which the day becomes the night, and thus they served as a reminder for early observers to suspend or 'abandon reality' and expect the unexpected. The word 'abandon' also refers to the shedding of one's inhibitions and giving oneself up to a particular passion with great enthusiasm.

In this spirit, the 2024 WCHR in Dallas was designed for us to "Be Enlightened by the Total Eclipse of Hair Science". Together, we will embark on an extraordinary 3-day journey into the frontiers of hair science, spanning from the analysis of single cells in the hair follicle to the study of human populations across the globe. We will explore the entire lifecycle of a hair follicle from its inception through adult life into senescence and through health and disease. We will learn about innovative methods for studying single cells within the hair follicle, new ways of quantitating hair growth, growing hair follicles in organoid culture and live imaging of hair follicle cellular dynamics. We will discover together novel ways to treat hair disorders, new drugs, devices, procedures, natural products, biologics, cell therapies and hair follicle neogenesis. We will become familiar with hair care and styling practices from around the world, learn about the global diversity of hair textures among human populations, and appreciate how hair disorders are impacted by environmental factors that interact with disease mechanisms. Looking toward the future, we will learn about big data, artificial intelligence and the power of global collaborative networks to accelerate our research endeavors focused on hair.

As we experience this journey of enlightenment together in the coming days, let us be mindful of the profound psychosocial impact of hair disorders on our patients, and recognize the extraordinary potential of our work to shine a light and make a difference. For many patients whose lives are shattered by hair loss, our collective efforts as a global community have the potential to not only regrow their hair, but to transform their lives, restore their confidence and give them the courage to make their dreams a reality. Each of us has a role to play, and none of us can do it alone.

Let us step into a new era in hair research as we experience the Total Solar Eclipse of 2024 together at this meeting.

We invite each of you to participate vibrantly in the WCHR 2024 - with enthusiasm - and with abandon!

BRONZE LEVEL

CONTRIBUTOR

WELCOME TO DALLAS

From world-class dining to endless shopping and a variety of entertainment options, BIG Things Happen Here. Six major professional sports teams and a sprawling arts district encourage nights full of adrenaline and entertainment. With more than 20 vibrant entertainment areas, even the most diverse groups will leave pleasantly surprised and satisfied.

ARTS & CULTURE

Winspear Opera House
Meyerson Symphony Center
Dallas Museum of Art
Nasher Sculpture Center

OUTDOORS & NATURE

Dallas Arboretum & Botanical Gardens
Dallas World Aquarium
Klyde Warren Park
Texas Horse Park
Dallas Zoo

TOP DISTRICTS

BISHOP ARTS DISTRICT

Once one of Dallas' best hidden gem, this two-block former warehouse area sits in the Oak Cliff neighborhood of South Dallas. It's home to more than 60 boutiques, restaurants, bars, coffee shops and galleries, making it one of Dallas' most unique districts.

UPTOWN

Located just northeast of Downtown, the historic McKinney Avenue Trolley line provides free rides from the north end of Uptown to the Dallas Arts District. This chic but historic area is now Dallas' nightlife capital. Cisit one of Uptown's dozens of high-end restaurants, trendy nightclubs and bars, along with unique shopping and world-class spas.

TRINITY GROVES

This 15-acre restaurant, retail, artist and entertainment destination sits at the base of the Margaret Hunt Hill Bridge in West Dallas. Pay a visit to a brewery, the culinary events center and multiple restaurants. The area is also home to the Restaurant Concept Incubator program, which encourages culinary entrepreneurs to develop restaurant concepts to become the newest addition on the block.

CONGRESS HOTEL AND MEETING LOCATION

The Fairmont Dallas Hotel
1717 N Akard St
Dallas, TX 75201 USA
Phone: +1-214-720-2020

Details about accommodations, rates, and reservations can be found at:
<https://hair2024.org/housing/>

Check-in time is 3:00PM and check-out time is 12:00PM (noon).

HOTEL PARKING

Parking is available at the Fairmont Dallas at the hotel's prevailing rates.

AIRPORT & GROUND TRANSPORTATION INFORMATION

Dallas is serviced by two airports:

Dallas/Fort Worth (DFW)

18 miles (30km) to/from airport to the Fairmont

Dallas Love Field (DAL)

5 miles (8km) to/from the Fairmont Hotel

DFW is the larger of the two airports and the only one that offers international flights. DAL is closer to downtown Dallas but has fewer flight options.

The World Congress does not provide ground transportation to/from the airport. Please plan to drive, taxi or take a rideshare (Uber or Lyft). You are responsible for making your own arrangements.

The estimated cost from DFW airport to Fairmont Dallas in a taxi is: \$45 USD.

The estimated cost from DAL airport to Fairmont Dallas in a taxi is: \$18 USD.

The Dallas Area Rapid Transit (DART) system runs route 408 between the airport and downtown Dallas. More information about DART: <https://www.dart.org/trip/trip-planner/dart-to-airports>

WEATHER

The weather in April in Dallas is typically quite dry. April temperatures are generally between 56°F and 72°F (13°C and 22°C). There is approximately 13 hours of daylight.

**MEETING ATTIRE**

The attire for the educational sessions is business.

This year's congress dinner will be a "Texas Hoedown" and attendees are encouraged to wear "Cowboy chic" with suggested attire of jeans, casual dresses, cowboy boots, and cowboy hats.

BADGES

An official AHRS-issued badge for the 13th World Congress for Hair Research is required to enter the meeting space. Alterations and tampering with badges is prohibited.

TICKETS

Tickets are required for the following events. For those in which you registered, the tickets will be included in your registration packet.

- Saturday Pre-Congress Courses
- Satellite Symposia
- Monday Congress Dinner

CELLULAR PHONE POLICY

The use of cellular phones in the General Session or workshop rooms is strictly prohibited.

Attendees must either turn off or vibrate cellular phones.

OFFICIAL LANGUAGE

The official language of the meeting is English. Simultaneous interpretation will not be provided.

PERSONS WITH DISABILITIES

The AHRS fully complies with the legal requirements of the Americans with Disabilities Act (ADA) and the rules and regulations thereof. If any participant in this educational activity is in need of support services, please notify the AHRS Headquarters Office at 1-630-578-3991 or info@americanhairresearchsociety.org as soon as possible, and preferably before March 1, 2024.

CANCELLATION/REFUND POLICY

Registration fees, less a \$100.00 administration fee, will be refunded upon written notice of cancellation to the Registrar's office received on or before March 20, 2024. After March 20, 2024, there will be no refund of fees for cancellation or for lack of attendance without notification. It is your responsibility to ensure that your cancellation request has been received by the Registrar's Office.

VIDEO, PHOTOGRAPHY & AUDIO RECORDING POLICY

Video recording and/or photography are strictly prohibited in all educational sessions. Under no circumstances are video, digital or still cameras to be utilized in the educational sessions. This includes photos and videos taken with cellular phones. Violators will have their cameras/equipment confiscated until the end of the meeting. Audio recording for personal use only is permitted (i.e., for gathering information and NOT for rebroadcast or reproduction). Photography of scientific material is strictly prohibited. The only exception to the photography policy is photos taken by the official WCHR photographer, for purposes of podium photos to use in WCHR publications.

ATTENDEE WI-FI

Network: Fairmont Meeting

Password: WCHR2024

RECORDED SESSIONS AVAILABLE

The scientific sessions will be recorded and available to those who registered for the congress. The recordings will be available from May 6, 2024, through August 6, 2024.

ASKING QUESTIONS IN THE SESSIONS

Attendees are encouraged to ask questions by submitting them via the Congress App. Attendees may also ask questions from the floor microphones during designated Q&A periods.

To submit your question:

- 1 **Open** the Congress app
- 2 **Tap** the Schedule tab
- 3 **Locate** the session in which you wish to ask a question and tap the session name
- 4 **Tap** "Q&A"
- 5 **Press** the "Ask Question" button to add your question.
- 6 **Press** Submit to submit it to the moderator

Download the Congress App for the Most Up-To-Date Information

- 1 **Go to** your phone's app store and download: **eventScribe**
- 2 **Click** Search for an Event
- 3 **Type** WCHR2024
- 4 **Tap** on the event icon
- 5 **Enter** your email address and the access key that was emailed to you. Click "Login".

PRE-CONGRESS WORKSHOP 104

The Who, What, Where and Why of Trichology

Pavilion Room • Ticket required

Trichology is the study of hair and scalp science and includes diagnosis, treatment and advice. **Trichologists** are typically non-medical professionals, having received appropriate trichology education, practicing in the private sector, and some are hair researchers. Trichologists have a range of formal education from hair dressing up to PhD level in some cases. However, medically trained doctors specializing in hair and scalp problems, diagnosis, research, and patient treatment are often also referred to as **Trichologists**, with variations by country and region. There is confusion in terminology, educational levels and qualifications, researcher engagement, professional regulation, and standards of practice that merit a closer look.

This session **The Who, What, Where and Why of Trichology**, will deliver perspectives on the definition and roles of **Trichologists** in the patients' journey to manage their hair and scalp problems. Short talks will be followed by a panel discussion which will consider:

- Should there be a global definition of a clinical trichologist and their role in the patient pathway?
- Is training for trichology practice properly recognized by the medical profession?
- Should the profession of the trichologist be regulated?
- What is the relationship between the trichologist, dermatologist and general practitioner in the patient pathway and how can this be improved?
- How could the hair research community encourage trichologists to participate in front-line research in scalp and hair science?

Who should attend? This session is open to everyone who wishes to understand trichology as a specialty/profession and who are interested to contribute to a future perspective on this area of scalp and hair science and practice.

The Effects of Stress on Graying of Hair

Ya-Chieh Hsu is a Professor of Stem Cell and Regenerative Biology, a Principal Faculty Member at the Harvard Stem Cell Institute, and an associate member of the Broad Institute.

The Hsu laboratory seeks to understand the principles and molecular nature of cell-cell interactions governing development, regeneration, and injury repair using the mammalian skin— an accessible organ with diverse cell types and multiple populations of somatic stem cells.

Welcome RECEPTION

DATE Saturday | April 6, 2024

TIME 7:15PM-8:45PM

FEE No extra fee required for registered attendees
Guest Tickets are \$95 USD

LOCATION Regency Ballroom, Fairmont Dallas

Join us in the exhibit hall at the end of our first day of sessions to socialize, unwind, view the poster presentations and visit with the exhibitors.

This event is open to all registered meeting attendees. Attendees may purchase an extra ticket for accompanying guest(s) during the registration process.

Cocktails and hors d'oeuvres will be served.

SATELLITE SYMPOSIUM 2
**Understanding JAK Selectivity and
Critical Appraisal of Trials in Severe AA:
Application to Clinical Decision Making**

with Lunch Sponsored by Lilly

International Ballroom • *Ticket required*
Activity Overview

Alopecia areata (AA) can be physically and psychologically devastating to patients. Janus kinase (JAK) inhibitors are transforming the treatment of AA. Emerging Phase 3 data from clinical trials of JAK inhibitors in AA shows improved patient outcomes. This activity will critically review the data and how it can be leveraged in clinical decision-making for patients with severe AA.

Learning Objectives

- Understand the rationale and relevance of JAK inhibitors on the pathophysiology of alopecia areata to (AA)
- Become familiar with the Phase 3 clinical trials for severe AA and how to critically appraise the potential impact of study design elements

FACULTY

Brett King, MD, PhD | *Associate Professor of Dermatology,
Yale School of Medicine, New Haven, Connecticut, USA*

Brittany Craiglow, MD | *Associate Adjunct Professor,
Yale School of Medicine, New Haven, Connecticut, USA*

SESSION 10
Hair Restoration Surgery

International Ballroom

Today's hair transplant patient has more choices than ever in terms of harvesting techniques and congruent medical therapies, but their final results still depend on the creative and ethical workmanship of their surgeon, in order to preserve the donor area while maximizing the natural cosmetic outcome in the grafted area. This session will focus on contemporary techniques, challenging situations, and provide pearls and inspiration to those who are both new to and experienced in the field of hair restoration.

SESSION 12

Single Cell Analysis of the Hair Follicle

Gold Room

Single cell analysis is an emerging technology enabling various omics approaches and the elucidation of cell-cell interactions at the single cell level. This session showcases how this novel technique is adopted for studying the dynamics of hair follicle biology and dissecting the pathophysiology of previously unknown of hair diseases.

Curbside Consults

Venetian Room

The goal of this fun and fast-paced session is to provide a platform for clinical hair experts from around the world to bring interesting case reports of undiagnosed hair disorders to present to your expert colleagues in search of a diagnosis.

Participants will 'crowd-source' ideas and provide feedback to help come to a diagnosis in real-time, or to suggest follow up next steps to investigate further in search of an answer to your unsolved cases.

Methods Matchmaking

Gold Room

The goal of this interactive and informal session is to provide a dedicated time and space for basic and clinical hair researchers to come together in search of new partnerships.

In this session, we encourage participants to come with ideas in search of collaborations aimed at tackling unsolved clinical or research questions using innovative new technologies.

Please bring a slide or two with your novel idea or a burning question, a series of cases with your favorite hair disorder, or a research problem worth solving to 'pitch' to the group, with the intention of forging new research pairings among basic and clinical hair research colleagues.

KEYNOTE

Joel Meyers, PhD | *Assistant Professor of Physics, Southern Methodist University*
Eclipses: From Ancient Observations to Modern Insights

Dr. Meyers' research focuses on extracting insights about fundamental physics from cosmological observations. The next generation of cosmological surveys will achieve unprecedented precision and therefore unprecedented data volumes, and new techniques are required to make the most of these upcoming opportunities. Dr. Meyers is currently an assistant professor at Southern Methodist University. Previously, he was a senior research associate at the Canadian Institute for Theoretical Astrophysics (CITA). Before joining CITA, he was a Ph.D. student at the University of Texas at Austin with Professor Steven Weinberg. He received his bachelor's degree in physics and mathematics from the University of Wisconsin.

SESSION 15 Scarring Alopecias

International Ballroom

In this session, we will address the most relevant areas of research in the field of scarring alopecia. Specifically, the methodology for studies in these alopecias, a therapeutic update on central centrifugal cicatricial alopecia, frontal fibrosing alopecia and neutrophilic scarring alopecias, and finally the association of fibroids and endometriosis and scarring alopecias.

SESSION 16
Hair Follicle Morphogenesis and Dermal Papilla

Venetian Room

In this session, we put together recent lines of progress towards new understanding about the formation of hair follicles in different skin regions, in repair versus regenerative wound healing processes, and in engineered skin organoids with emphasis on regaining dermal papilla properties. Through the interaction in this session, we hope to integrate our current knowledge about follicle morphogenesis and move toward translation.

SESSION 17
Hair Care and Aesthetics

Gold Room

The hair care and aesthetics session will bring together academic and industry scientists to share their research on the discovery of new molecules and evaluation methods that can benefit to the quality of hair fiber. This is a unique session where biology, chemistry and physics meet where the audience will learn about different hair types, how to improve fiber health, and valuable cosmetic options for patients with hair disorders.

TOTAL SOLAR ECLIPSE VIEWING with box lunch
Box lunch distribution 12:30PM-1:15PM

Join us for the pinnacle experience of the congress, viewing the total solar eclipse together on the pool deck.

At the conclusion of the previous session go to the Terrace Level of the hotel (3rd floor) to pick-up your eclipse viewing glasses, boxed lunch, and find space on the deck.

The peak of the eclipse will be at approximately 1:43PM, including almost 4 minutes of complete darkness.

The eclipse viewing lunch is included for all registered congress attendees. Your badge is required to attend. You may purchase a ticket for your guest/spouse at the registration desk.

SESSION 22
Hair Follicle Pigmentation, Cycling, and Senescence

Venetian Room

This session is focused on the novel and highly clinically relevant aspects of hair pigmentation and hair cycle control – two principal biological phenomena being compromised during the process of hair follicle senescence. Five talks from world-leading labs will address the role of follicle stem cells in hair pigmentation and in catagen progression, current state and further directions of hair graying research, as well as metabolic and mitochondrial impact upon hair follicle cycling and aging.

Congress Dinner | Gilley's Dallas • *Ticket required*

Grab your jeans, boots, and cowboy hats, and join us for the Texas Hoedown Congress Dinner at Gilley's Dallas!

As we celebrate a memorable congress, we will spend time with our colleagues enjoying traditional Texas barbecue cuisine, listening to a live country music band, and learning a few country line dances together.

LOCATION Gilley's Dallas
1135 Botham Jean Blvd.
Dallas, TX, 75215

TIME 7:00PM-10:00PM

COST \$150 USD

ATTIRE

This year's congress dinner will be a "Texas Hoedown" and attendees are encouraged to wear "Cowboy chic" with suggested attire of jeans, casual dresses, cowboy boots, and cowboy hats.

TRANSPORTATION

Shuttle service will be offered from the Fairmont Dallas.

Bus Loading 6:30PM • Depart at 6:45PM

Returns beginning at 8:30PM • Last Shuttle departs 10:15PM

TUESDAY • APRIL 9

7:00AM-2:00PM	Speaker Ready Room State Room
7:30AM-2:00PM	Registration Oak Room
7:30AM-8:00AM	EHRS General Assembly Gold Room <i>Invitation Only</i>
8:00AM-8:45AM	Coffee with the Experts International Ballroom

Open to all attendees on a first-come, first-served basis. This is an informal session for small groups to discuss a specific topic as noted on the list. The round tables will be labeled with a topic and table leaders' names. You may sit at any table you like and rotate to as many tables as you wish. Bring your questions! The idea is to have dialogue among those interested in the topic – an interesting conversation. These are not formal presentations.

KEYNOTE LECTURE

Vladimir Botchkarev, MD, PhD | *Professor of Dermatology, Boston University*

All Roads Lead to the Nucleus: How Epigenetic Machinery Orchestrates Hair Growth

Vladimir Botchkarev, MD, PhD is a Professor of Dermatology. He received his medical training at Chuvash State University in Cheboksary, Russian and his doctoral training at People's Friendship University in Moscow, Russia. He was a recipient of the Research Career Development Award from the Dermatology Foundation and Independent Scientist Award from the National Institutes of Health. He is also a recipient of the research grants from the NIAMS and NCI. His name was included in the books 2000 Outstanding Scientists of the 21st Century, Great Minds of the 21st Century and Who is Who in Medicine. His primary research interests are the molecular mechanisms of hair growth and pathobiology of different forms of hair loss.

Professor of Dermatology and co-Director of the Center for Aging Research, Dr. Botchkarev focuses on epigenetic factors influencing skin stem cell activity, aging, wound healing, and carcinogenesis. He has more than 100 publications in journals such as *Nature*, *Cell Biology*, *Science Advances*, and *Cancer Research*. Supported by NIH grants, his work is instrumental in understanding skin aging and using Naked Mole Rats as a model for studying human skin diseases.

11:00AM-12:00PM

SESSION 26

Biology and Biophysics of Textured Hair

International Ballroom

This session will equip attendees with invaluable insights on:

1. How to approach and handle hairloss in patients from various cultural and religious backgrounds and the do's and don't's for trichoscopy photography of curly hair .
2. Garner insights on what normal trichoscopy is, for melanin rich skin types
3. Learn more about the psychological disorders that present with hair loss and what hair camouflage prostheses are available for Black patients with hair loss

SESSION 27
Pediatric Hair Loss and Genodermatoses

Venetian Room

This session focuses on monogenic alopecia and hair structure abnormalities as well as on multifactorial alopecia areata. A possible new variant for monilethrix will be reported and the largest collective of patients with uncombable hair will be presented. The second part will deal with the safety and efficacy of treating alopecia areata patients with JAK inhibitors. In line with the latter topic, there will be another presentation on the clinical and etiologic factors associated with the manifestation of immune-mediated comorbidities and nail abnormalities in alopecia areata.

CHAIR

SESSION 29
JAK Inhibitors in the Treatment of Hair Loss

International Ballroom

Janus kinase (JAK) inhibitors have forever changed alopecia areata (AA), making treatment of moderate to severe disease possible. There is data suggesting that JAK inhibitors may be effective for treatment of other inflammatory alopecias, too. In this Session, the broad reach and potential of JAK inhibitors across inflammatory hair loss disorders will be reviewed.

CHAIR

12:15PM-1:15PM

SESSION 30

Psychosocial Burden of Hair Disorders & Outcome Measures

Venetian Room

The study of the mental component associated with trichological manifestations reflects a modern personalized approach to the patient. Understanding the negative impact of stress on hair growth and integrating coping strategies in the treatment of trichopathologies, as well as the development of new pharmacotherapeutic strategies, may lead to expanded therapeutic modalities with relief of clinical symptoms as well as associated psychological consequences. The session will present the results of modern clinical studies carried out in tandem by dermatologists, psychiatrists and psychologists, focused on studying the impact of hair diseases on the patient's quality of life, the development and validation of rating scales for various trichopathologies, and the analysis of correlations of specific forms of alopecia with mental illnesses.

SESSION 31
Ethnobotany & Natural Compounds for Hair

Gold Room

Ethnobotany as defined by the Oxford Dictionary is 'the scientific study of the traditional knowledge and customs of a people concerning plants and their medical, religious, and other uses'. However, plant derived actives and their uses has now transcended historical links to indigenous and geographical peoples, to become a mainstay of therapeutics and cosmetics, particularly in hair care. The session will reveal exciting novel clinical uses for two plant derived materials in alopecia, as well as discussing the sources, evaluation and benefits of plant derived actives for scalp and hair health.

www.ishrs.org

Table D

The International Society of Hair Restoration Surgery (ISHRS) is a global non-profit medical association and the largest organization dedicated to hair restoration surgery, comprised of 1,200 members from more than 70 countries. The ISHRS is dedicated to achieving excellence in patient outcomes by promoting the highest standards of medical practice, medical ethics, and research in the medical hair restoration industry. Member categories include Fellow, Member, Associate Member, Adjunct (researchers), Residents, and Surgical Assistants. Researchers and clinicians are welcome to join!

A large part of the ISHRS's effort is dedicated to ensuring the safety of patients and developing methods to minimize risks to patients while meeting the expectations of patients. The ISHRS has published and maintains FUE Clinical Practice Guidelines, FUT Clinical Practice Guidelines, the Core Curriculum in Hair Restoration Surgery, and the Core Competencies for Hair Restoration Surgeons. The ISHRS provides quarterly research grants to relevant clinical research projects directed toward the subject of hair restoration.

The ISHRS provides continuing medical education to physicians and fosters an environment of open dialogue, sharing, and collegiality. The ISHRS gives the public the latest information on medical and surgical treatments for hair loss. The ISHRS is accredited by the ACCME, is a member of the AMA's House of Delegates, and is a liaison organization member of the Comité Européen de Normalisation (CEN) [European Committee for Standardization] task force 403 "Aesthetic Surgery Services" where it assists with developing standards for hair transplantation among countries within the European Union.

Korean Hair Research Society Hosts of the WCHR2026

Table E

As a member society of Korean Dermatological Association, the Korean Hair Research Society was launched as hair research subcommittee in 1999, inaugurated officially in 2004, and has arrived today so far. The Korean Hair Research Society conducts academic activities, research, and education on hair to support hair loss patients. The Korean Hair Research Society has been holding an annual meeting since 2004, and this meeting consists of invited lectures, educational lectures, oral and poster presentations. KHRS has now grown up as one of the key members of the international hair research societies.

The KHRS will be hosting the next World Congress for Hair Research, taking place May 28-31, 2026, in Seoul, Korea. Stop by our table for more information!

National Alopecia Areata Foundation

Lisa Anderson, PhD, Senior Director of Research
65 Mitchell Blvd, 200B
San Rafael, CA 94903 USA

Phone: 1-415-472-3780

info@naaf.org
www.naaf.org

Table A

The National Alopecia Areata Foundation (NAAF) is the voice of the alopecia areata community, serving the nearly 7 million Americans affected by this autoimmune disease, which causes unpredictable, often sudden and severe hair loss. Frequently dismissed as a cosmetic condition, alopecia can be a deeply traumatic experience, resulting in emotional and economic pain and social isolation. It is not just hair. A catalyst for driving research, support, and awareness, NAAF empowers the community with more choices to embrace or live free of alopecia areata. We connect the patient, medical, and scientific communities to drive research and treatment development, raise awareness to reduce stigma, and provide support to improve lives.

Scarring Alopecia Foundation

Jean Pickford, Executive Director
1586 Sumneytown Pike, #1322
Kulpsville, PA 19443 USA
Phone: 1-267-613-9811
info@scarringalopecia.org
www.scarringalopecia.org

Table B

The Scarring Alopecia Foundation (SAF), previously known as the Cicatricial Alopecia Research Foundation (CARF), stands as the sole patient advocacy organization globally dedicated to advancing research, education, and support for individuals affected by this condition. Our work is focused on finding a cure and empowering patients towards leading healthy, fulfilling lives. Established in 2004, SAF has evolved from its origins as a small patient collective to encompassing a network of 7,000 patients and medical experts worldwide. Opportunities are ripe to accelerate research to find the cause and develop new and effective treatments for this permanent inflammatory hair loss disease. Through a multifaceted approach of driving research, education, and support initiatives, SAF works to address the unmet needs of this escalating patient community and offering a beacon of hope for the future.

Skin of Color Society

Kimberly J. Miller, Executive Director
1932 S. Halsted St., Suite 413
Chicago, IL 60608 USA
Phone: 1-630-578-3991

RULES AND PROPER ETIQUETTE

The World Congress is an educational activity. Attendees are expected to maintain professional etiquette and extend proper courtesies. Inappropriate behaviors will not be condoned. The meeting should not be used as an opportunity for solicitation of other physicians' staff or other unethical, inappropriate, and distasteful activities. It may seem obvious, but it is inappropriate and rude to make negative or soliciting comments to the live patients in the various sessions. Negative or disparaging comments about a patient's condition or surgical results to the patient are offensive, psychologically hurtful, and violate our ethical commitment to "do no harm." Patients who agree to participate, as well as the doctors who bring them, deserve our respect and support for their willingness to subject their results to scrutiny and contribute to our learning experience.

Soliciting business in virtual or physical meeting rooms or spaces is prohibited. Only registered exhibitors, in the Exhibit Hall, may solicit business. There will be no distribution of handouts, flyers, or promotional items other than the official Abstract Book, or other than exhibitor items in the exhibit hall. Any handout or flyer intended for the handout table by the registration desk must be pre-approved by the AHRS Executive Director. Any unapproved handouts will be removed and discarded. Inappropriate postings in the virtual platform, Congress app, or other meeting spaces or message boards will be removed and discarded.

The timing of any private ancillary meeting must be approved by the AHRS.

It is vital for the doctors to discuss their complications and show patient photos. Public disclosure of a specific doctor's complications or patients is prohibited. There are ongoing debates in any field of evolving science, and disagreement between professionals is expected. However, inflammatory or inappropriate criticism of any specific lecture that has been made in good faith and according to the ethical standards of our discipline is prohibited.

The purpose of these guidelines is not to suppress free speech or to conceal items from the public; rather, it is to encourage a free exchange among doctors without worries that anything said or done will be used against them by a competitor. All doctors have complications at various times, but it takes a special form of integrity to discuss them before a large group of colleagues. By the same token, we understand that most of the non-medical promotional professionals in our field provide a helpful public service while pursuing their business interests. We hope this communication between us will be on a high professional level that will benefit both the field and the patients.

DISCLAIMER

Registrants understand that the material presented at the World Congress has been made available under sponsorship of the American Hair Research Society (AHRS) for educational purposes only. This material is not intended to represent the only, nor necessarily the best, method or procedure appropriate for the medical and scientific situations discussed, but rather is intended to present an approach, view, statement or opinion of the faculty which may be of interest to others. As an educational organization, the AHRS does not specifically approve, promote or accept the opinions, ideas, procedures, medications or devices presented in any paper, poster, discussion, forum or panel at the World Congress. Registrants waive any claim against AHRS arising out of information presented in this Congress.

Registrants understand and acknowledge that volunteer patients have been asked to participate in the World Congress sessions for educational and training purposes. Registrants shall keep confidential the identity of, and any information received during the World Congress regarding, such volunteer patients.

Registrants further understand and agree that they cannot reproduce in any manner, including, without limitation, photographs, audiotapes and videotapes of the World Congress sessions. All property rights in the material presented, including common law copyright, are expressly reserved to the presenter or to the AHRS. The sessions may be audio, videotaped, or photographed by the AHRS.

By attending this program, in no way does it suggest that participants are trained and/or certified in the discipline of hair restoration surgery. All speakers, topics, and schedules are subject to change without prior notification and will not be considered reasons for refund requests.

Registrants agree to abide by all policies and procedures of the ISHRS. Registrants waive any claim against ISHRS for injury or other damage resulting in any way from course participation.

BEAT FEMALE HAIR LOSS

With CALECIM® Professional Advanced Hair System

“Results are consistent, with regrowth visible after six treatments. It’s safe enough for women who are already suffering from poor health and may not be able to withstand the side effects of hair drugs, too” – Dr. Munir Somji

40%

of women have experienced hair loss by the age of 50
(Shannon et al., 2015)

63%

said it caused career-related problems
(McHale, 2004)

95%

of patients have seen success in hair growth and hair quality with Advanced Hair System
(Observation of over 100 patients across clinics)

Before

After 6 weeks

A recommended treatment course is 6-weeks of weekly sessions, followed by a maintenance program. The application is easily administered in-clinic with micro needling, or at home with CALECIM®'s supplied activator.

World Congress for Hair Research Open Slot 2030

Anyone interested in finding out more should meet with members of the Open Bid Task Force during the WCHR2024 Dallas at the following session/table:

2030 OPEN BID Q&A

Tuesday, April 9, 2024 | 1:30-3:00PM

SESSION 32

Closing Ceremony & Lunch

International Ballroom, Fairmont
Dallas, at the WCHR2024

**Meet us at the table marked
2030 OPEN BID Q&A**

**We are delighted to announce
the launch of the 2030 Open Slot bidding process.**

This is a new initiative, recently introduced into the calendar of the World Congress for Hair Research. In this unique instance, a bid to host the Open Slot need not come from an existing IFHRS member society. However, the bid must come from a bid team with a genuine interest in promoting Hair Research with the strengths, confidence, and capabilities to organize and host this event and the team must outline compelling reasons for their choice of location/timing which make the event unique in the cycle of hair research congresses.

Understanding JAK Selectivity and Critical Appraisal of Trials in Severe AA: Application to Clinical Decision-Making

SUNDAY, APRIL 7, 2024 | 12:45 – 1:45 PM CDT | IN-PERSON 

International Ballroom, The Fairmont Dallas Hotel

OVERVIEW

Alopecia areata (AA) can be physically and psychologically devastating to patients. Janus kinase (JAK) inhibitors are transforming the treatment of AA. Emerging Phase 3 data from clinical trials of JAK inhibitors in AA shows improved patient outcomes. This activity will critically review the data and how it can be leveraged in clinical decision-making for patients with severe AA.

AGENDA

- **Welcome and introductions**
Brett King, MD, PhD
- **What is the rationale for the approved JAK inhibitors in alopecia areata?**
Faculty
- **A critical review of data for the approved JAK inhibitors in alopecia areata**
Faculty
- **Q&A**
- **Closing remarks**
Brittany Craiglow, MD
